

What is Texas Medical Management?

Quality care without surprises.

About Us

With decades of healthcare experience, our team delivers the highest quality care at transparent, competitive prices. We do this by partnering with great surgeons, peer-selected by our surgeon board for their expertise, patient outcomes, focus and reputation. We believe that removing the impediments to a good doctor-patient relationship will improve healthcare for all of us.

Patient Outcomes

Patients are asked to rate their pain, difficulty, and/or stress before and after surgery. Additionally, we ask the likelihood of recommending Texas Medical Management to family or friends.

HOW DOES IT WORK?

- Employers sign a simple contract and educate their employees about the benefit and savings.
- Need outpatient surgery? The employer and TPA direct the member to use this benefit. The employee visits: texasmedicalmanagement.com to confirm quality of surgeons and facilities.
- Employees contact us to schedule with one of our board-certified surgeons. The employer or their administrator pays in advance or within 7 days after surgery.

SOLUTIONS

Texas Medical Management bundles surgical care in a transparent single price. In doing so, we can eliminate unnecessary costs by removing the middleman. We share those savings with you and your surgeon.

TESTIMONIAL

1

TMM Patient

As an RN who worked for a large hospital, I want to say what a crazy experience, but good one, not having to deal with all the red tape involved with treatment in a hospital setting. And not having to deal with insurance! This was a blessing for our family and we are very appreciative. We would recommend your services to anyone needing surgery at a fair price, and seeking excellent care. Thank you!
